VAISHNAVI BHARADWAJ

Advanced Application Engineering Analyst

Data Analyst — Product Analytics & Business Intelligence

+91 8825353133 vaishnavipathak213@gmail.com Linkedin GitHub

Portfolio

EDUCATION

Year	Degree	CGPA / %	Institute
2015	Class X (ICSE)	83.6%	North Point Childrens School, Bihar
2017	Class XII (CBSE)	61.8%	Oxford Public School, Bihar
2022	B.Tech (Electronics and Instrumentation)	9.14/10	Haldia Institute Of Technology (MAKAUT), West Bengal
2026	MBA (Business Analytics)	9.45/10	Manipal Academy of Higher Education, Karnataka

WORK EXPERIENCE

Accenture – Advanced Application Engineering Analyst

Project: AT&T – Telecommunications, US (Infra, API Monitoring, Production Support) **[Jul 2023 – Dec 2025]**

- Enhanced Linux/Unix server reliability via health checks, log diagnostics, & automated service recovery, improving uptime by **15%+**.
- Engineered **C2W** workflows & API observability using AppDynamics, Dynatrace, Grafana, improving alert triaging & reducing MTTR by **25%**.
- Resolved **200+** kiosk tickets, achieving **30%** faster turnaround; analyzed historical records via **Power BI** to deliver flagship sales KPI dashboards.

Project: ALLIANZ - Insurance, Spain (Backend Development) **[Jan 2026 – Present]**

- Spearheaded full-cycle backend development for an **insurance app** using **PHP/Symfony** in VS Code, engineering structured controller, service, & DTO layers integrated with **D3 Pick** MultiValue databases.
- Architected **Multiasistencia** integrations to optimize screening pipelines, leveraging indexed structures & query tuning to improve throughput.
- Overcame a Spanish knowledge-transfer challenge via **Whisper transcription**, leading manager-requested team walkthroughs & earning the **Accenture Star Performer Award** (∼15 days).

PUBLICATIONS

- N. Krishna, S. Kumar, **V. Bharadwaj**. "Conversational Custodians: Deploying Large Language Model-Powered Agentic Systems for Dynamic Digitisation and Contextual Revival of Intangible Cultural Heritage". *Proceedings of the International Conference on Computation and Humanities (CHORDS) 2026*. **(Presented; journal-publication selection process ongoing)**. Roles: Validation, data curation, formal analysis, manuscript review, human evaluation of 50 responses. | Certificate

PROJECTS

Data Science Learning Hub | **Full Stack** | **Demo** **[Aug 2025 - Present]**

- Built **Ed-Tech SPA** across 12 subjects & 70+ modules; conceived 3 synchronised algorithm-visualisation panels (code, data-structure state, micro-step output) for **BFS, Dijkstra's, & Merge Sort**.
- Built adaptive quiz engine with spaced-repetition and integrated **Sentence Transformers** for cross-subject topic similarity.
- Delivered GATE DA syllabus with KaTeX, Mermaid diagrams, & **offline-first code-split** architecture for instant startup.

EduVidQA | **LLM-Powered Video Analysis** **[Aug 2026 – Present]**

- Engineered lecture-video QA featuring **Bloom's-taxonomy** quizzes, incorrect-answer feedback, & ongoing student feedback.
- Conducted automated comparison vs. YouTube AI using identical questions, videos, & timestamps (ongoing data collection).

IIT Patna NLP Assessment | **Multilabel Classification** **[Sep 2026]**

- Executed **Jigsaw** dataset multilabel classification for Senior Research Fellow selection, establishing a TF-IDF/logistic regression baseline.
- Fine-tuned **DistilBERT**, applying class weighting & validation-based thresholds to optimize prediction accuracy.

Revenue Forecasting Using Regression — Predictive Analytics **[Jan 2026 – Jun 2026]**

- Benchmarked 5 ML regression models on 505K+ customer records; achieved 87.73% accuracy with Polynomial Regression.
- Isolated key customer churn drivers via OLS regression analysis to formulate actionable dollar-value retention strategies.

Socio-Economic Health Analytics — Satellite Remote Sensing & ML **[May 2024 – Sep 2024]**

- Built predictive gradient boosting pipelines on multi-spectral satellite data, performing EDA for an 11.39 RMSE baseline.
- Isolated top 200/500 features via XGBoost importance scoring; addressed sparse data via mean/median imputation.

INTERNSHIP

Java Full Stack + GCP Training | **Wipro** **[Apr 2022 – Sep 2022]**

- Completed full-stack training covering backend services, frontend frameworks, cloud workflows, & modern software practices.
- Integrated Teachmint Admin Portal with EventBeep using GCP Functions & Cloud Storage, enabling seamless data handling.

Automation Projects | **Cognizant** **[May 2022 - Aug 2022]**

- Built UI automation suites using Selenium + Java for the Live Support GSD Portal, Display Bookshelves app, & Online Book Search.
- Improved test coverage by **11%** & reduced manual regression effort through automated workflows, enabling faster releases.

ACHIEVEMENTS

- Served as **Joint Secretary** for ISA & ISOI student chapters in 2021, contributing actively to events & organizational initiatives.
- Secured **1st** place in the **CIRCUITRIX** hardware competition organized by the **IEEE** Society in 2019, showcasing technical proficiency.
- Completed a **Senior Diploma** in **Kathak** from Allahabad University in 2017, showcasing dedication to classical dance.

COURSEWORK INFORMATION

- **Business Analytics (MBA):** Data Visualization, Exploratory Data Analysis, Regression, Business Analytics, Data Governance & Stakeholders
- **Electronics & Instrumentation:** Microprocessor 8085 and 8086 | VLSI | Digital Computing | Analog | Optical instrumentation
- **Mathematics:** Probability & Statistics, Linear Algebra, Numerical & Complex Analysis, Transform Calculus, Advanced Calculus
- **MOOC:** Google Cloud Big Data & Machine Learning Fundamentals | Blockchain, Solidity & Smart Contracts | Data Security & Code of Ethics

SKILLS AND EXPERTISE

- **Programming Languages:** Java, JavaScript, Python, SQL, C++, R, C#, Bash, HTML, **PHP/Symfony**
- **ML, AI & Frameworks: scikit-learn**, **Transformers**, **Sentence Transformers**, React, Tailwind CSS, Angular, Node.js, **Whisper, DistilBERT**
- **Cloud & DevOps:** Google Cloud Platform, Azure, Linux/Unix Administration, AppDynamics, Dynatrace, Grafana, Microservices, REST APIs
- **Developer Tools:** Power BI, VS Code, Git, GitHub, Postman, Tableau, JIRA, Automation Scripting, MySQL Workbench
- **Core Competencies:** Production Support, API Monitoring, Server Operations, Troubleshooting & RCA, UI Automation, Documentation

CERTIFICATIONS

Salesforce Certified Administrator | Microsoft Azure Fundamentals | GCP ACE certification | GCP Digital Cloud Leader | MongoDB SI Associate Certification | Introduction to Internet Of Things by NPTEL | Oracle Fusion AI Agent Studio Foundations Associate | Oracle AI Foundations Associate | Machine Learning and Deep Learning Specialization by Andrew Ng, Coursera | Introduction to Algorithms, MIT OpenCourseWare | Build with AI Bootcamp (Hack2skill)
